Note:

Please check which *Plus* kit you need in relation to the CSC (see below).

CONCENTRIC SLAVE CYLINDER FORD/MAZDA

Ford Fiesta, Ka, Focus, Puma, Courier & Mazda 121

OE Numbers XS41 7A564 EA & 1E00 16 540 /A have undergone a design change, with the original cast aluminium unit being replaced by a new plastic version.

The old cast unit had a conventional bleed nipple, whereas the new plastic version comes with a quick release nipple. This however, is larger than the original cast one and therefore will not fit through the holes in the gearbox of earlier vehicles which have 17mm diameter holes.

Therefore **VCK6000** is now the later OE equivalent plastic type and a new part number **VCK6048** has been created specifically for vehicles with the earlier gearbox.

For full details and images, refer to Technical Bulletin - VT1002 which can be found at www.vecoautomotive.co.uk
